DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

The specification is objected to as it appears to designate an incorrect codon ("K42E") for the mutation shown at Figure 3C. The specification teaches that SEQ ID NO: 1 is the Aire-1 transcript (see sequence listing). The specification teaches that 2 mutations (see Figure 3) were found in the Aire-1 transcript (page 14, lines 4-5). At figure 3C, the substitution of an "A" to a "G" corresponds to position 383 of SEQ ID NO: 1, which does not occur at codon 42 but rather at codon 83 (see previous office action and SEQ ID NO: 1 for designation of start codon). Accordingly, the designation of "K42E" appears inconsistent with the data provided in the specification. To overcome this objection applicant is requested to provide evidence that the error was a typographical error and not the result of inconsistent data, in the form of a declaration for the written record, and amend the specification to reflect the correct codon so as to be consistent with the data in figure 3. Should applicant find that the error was not typographical in nature, but reflects inconsistencies in data, prosecution on the merits will be reopened to address instant claim 37.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
